

The image shows a login interface for Opus College. On the left is a logo with the word "OPUS" at the top, a stylized sunburst icon in the middle, and the word "college" at the bottom. To the right of the logo is a light blue rectangular box containing the login fields. Inside this box, the word "Enter:" is positioned above two input fields. The first field is labeled "user name:" and contains the text "Nkonda". The second field is labeled "password:" and contains seven black dots. A blue "Submit" button is located to the right of the password field.

After we have added the Dean, Head of Department and Lecturers, we now can start with the registration of the PROGRAMMES OF STUDY, offered by the School/Department.

This process involves the following:

1. Register the general information about the programme (which type: BSc, MSc, etc., which academic year, which field, etc...)
2. Indicate the requirements concerning the Secondary School Subjects in order to be able to enter the programme.
3. Create the list of Courses for each time unit (semester, trimester...) of the Programme.

A Programme of Study can be registered by either the Dean of the School or the Head of Department. Again we will login as Dean.

In this instruction we will deal with steps 1 and 2 mentioned above. The creation of Courses and linking them to a Programme of Study (step 3) will be dealt with in the next video of this series.

We now get a screen with a few fields holding basic information on the (field of) Study the Programme applies to:

- The name of the Study
- The Academic Field the study belongs to.
- The Date of establishment, which is the date the decision has been taken to organize the Programme of study.
- The Start date, which is the date the Programme of Study actually has started the first time.

The term "Cardinal time unit" in OPUS-College refers to the type of time periods the Programme of Study is divided into. Most common this will be either: semester, trimester or year.

So here choose what applies to your situation.

[back to overview](#) > [Computer Science](#) > add/edit Programme of study

Submit

Here you can indicate how much time units a student may take to finish the whole study. For instance if you say 7 for a 6 semester Programme, this means that a student could redo 1 semester in the total of the Programme, but only 1.
