### University System for Academic Registry

In the previous step we have created a "Second level unit" called "Office of the Dean".

The next step now is to create the "user (role of) Dean".

This involves the following steps:

1. Create a Staff member record for the Dean (or the one authorized to play the role of Dean) and link this to the "Office of the Dean".
2. Apply the authorization (role) of Dean to the Staff member created.

The creation of the user role of Dean, again is a function for which only the central level (administrator) of the institution is authorized. So we once again have to login as a central admin user.

Add

To do so, go to "Staff members - Add".
